About Clown

Clown coin is a binary smart chain network based on the BEP-20 token. A deflation mechanism will be built. The pre-sale of clown coin will be launched on June 13, 2021. There are three functions in each transaction: holding clown clown coins to distribute BNB rewards, clown clown coins rewards, and automatic addition of PancakeSwap liquidity pool.

Clown coin is completely decentralized, and all decisions are made by community voting. This allows our developers to better understand how to use Clown coins. Clown coin is a pre-sale issued token, the development team does not have a team token. In other words, our team must participate in the Clown pre-sale together with other investors.

Summary

The only purpose of the creation of Clown is that investors can receive BNB rewards while holding the token Clown. This is a fairly new concept and not easily available in the market or other tokens. Clown coins will far surpass another memetic project. In fact, we intend to become one of the first memetic tokens with real value and become a utility token.

Ecosystem

The Clown Coin is a BEP20 token that will add liquidity to PancakeSwap on June 16, 2021. The maximum supply of the Clown Coin is 10 million.

4% of each transaction will be directly distributed to all clown coin holders in BNB. Holders can receive BNB rewards every day or N days

4% of each transaction automatically flows into the PancakeSwap pool to provide liquidity

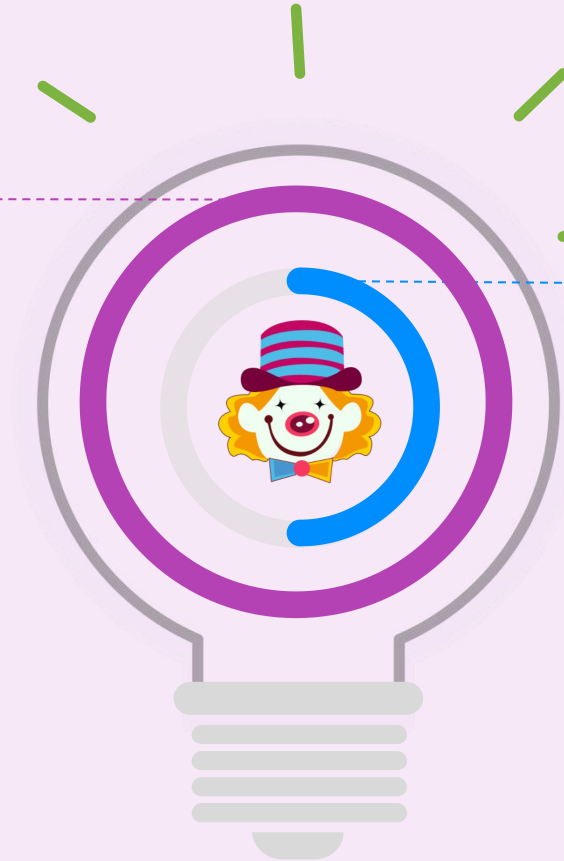

1% of each transaction will be directly distributed to the clown coin holders

Clown coin will deduct 9% handling fee for each transaction

How can I earn 1 billion U.S. dollars by holding Clown coins?

4%

This is a very unique model that has only been done once. Every time someone buys or sells Clown, the percentage (4%) of the BNB they buy/sell will be acquired and held in the smart contract.

1%

You can collect the amount of BNB based on the Clown coins you hold. For example, if you hold 1% of Clown's supply, you can get 1% of the BNB reward pool.

If a holder collects more than 1BNB rewards, 20% of the funds will be used to purchase 1BNB Clown coins on PancakeSwap and destroyed immediately. This will help us reduce supply and increase the price of Clown coins

Clown小丑币简介

Clown小丑币是基于BEP-20代币上的二进制智能链网络，将建设一个通货紧缩机制，clown小丑币预售将于2021年6月13日推出。每笔交易中有三项功能：持有clown小丑币分配BNB奖励分配clown小丑币奖励以及自动添加PancakeSwap流动性池。

Clown小丑币是完全去中心化的，所有的决定都是由社区投票决定的。这让我们的开发人员更好地了解如何使用Clown小丑币。Clown小丑币是预售发布的令牌，开发团队没有团队令牌。换句话说，我们的团队必须与其他投资者一起参与Clown小丑币预售。

摘要

Clown小丑币的创建唯一的目的是投资者在持有代币Clown小丑币的同时能够收取BNB奖励。这是一个相当新的概念，在市场或其他代币中并不容易获得。Clown小丑币将远远超过另一个模因项目。事实上，我们打算成为第一个具有实际价值的模因令牌之一，并成为实用令牌。

生态系统

持有Clown小丑币，如何能赚到10亿美元呢？

4%

这是一个非常独特的模型，只做过一次，每次有人买入或卖出Clown小丑币，他们买入/卖出的BNB的百分比（4%）都会在智能合约中获得和持有。

1%

你可以根据你持有的Clown小丑币来收取BNB的数量。例如，如果你持有Clown小丑币供应的1%，你可以获得BNB奖励池的1%。

如果一个持有者集到超过1BNB的奖励，那么领取时20%的资金将被用来在PancakeSwap上购买1BNB的Clown小丑币并立即销毁。这将有助于我们减少供应，提高Clown小丑币的价格
